PROBLEM?

How can a hybrid forecasting model achieve first-month quarterly revenue accuracy within ±5%, and how can external signals be systematically incorporated to extend reliable forecast horizons across future quarters?

EXPLORATORY DATA ANALYSIS

Data Understanding

Data Cleaning

Time Series Aggregation

Segmentation Analysis

Feature Selection

APPROACHES (PLANNED)

Hybrid Model

XGBoost

Best Accuracy

Non Linear Patterns

O/S Ratio, ICI, External Features

SARIMA

Benchmark Model

Linear Patterns

Trend & Seasonality

EVALUATION PROCEDURE(PLANNED)

Compare : SARIMA VS XGBOOST VS HYBRID MODEL

Measures : MAPE, RMSE, MAE, R^2
